Traditium®

A SUSTAINABLE AND CUSTOMIZED ALTERNATIVE

TRADITIUM® represents a new generation of monuments, offering a personalized, durable, waterproof, and secure alternative for the placement of a loved one's ashes.

The monument is installed on a cemetery plot, the urn is inserted inside, and everything is sealed using an ultra-secure locking system. All TRADITIUM® products are protected by intellectual property, including trademarks, industrial designs, and are currently pending patent applications in nearly 70 countries.

*The
Personalized
Family Tribute*

THE FUTURE OF FUNERAL SERVICES

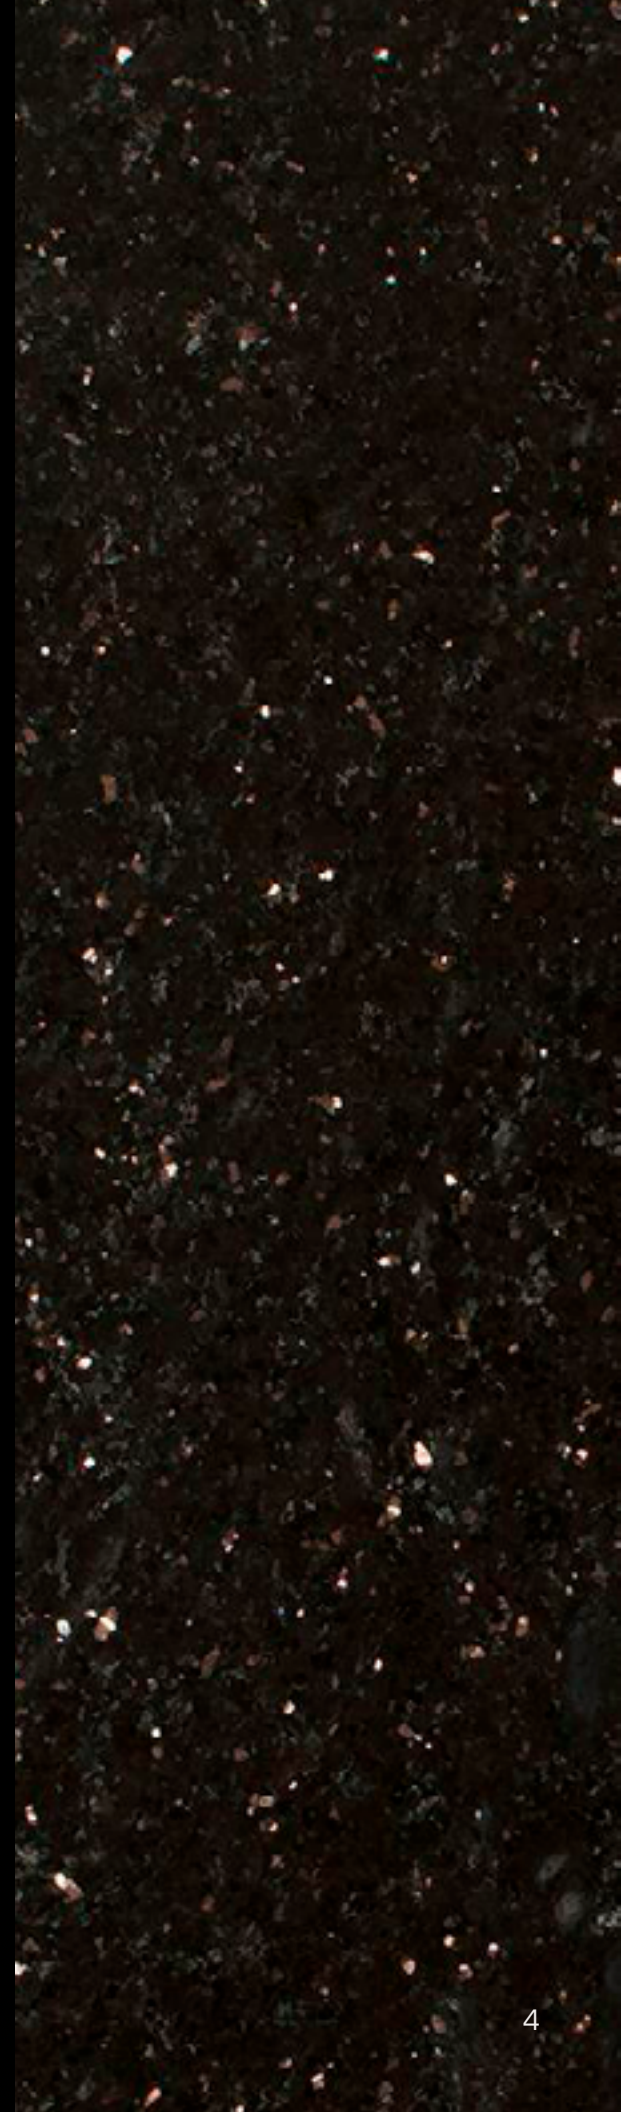

A Family-Owned Business.

Our range of TRADITIUM® columbaria is the result of extensive research and development. Operating in the funeral monument industry since 1985, we have witnessed changes in funeral customs. Recognizing the growing preference for cremation and listening to the needs of our clientele, we have developed a comprehensive range of family columbarium products.

Artistry Inspired by Passion.

TRANSCENDING GENERATIONS

Signed Traditium.®

THE ULTIMATE IN WATERPROOFING

Known as TRADITIUM®, this new generation of monuments is a personalized, durable, waterproof, and secure alternative for the placement of a loved one's ashes. The monument is installed on a cemetery plot, the ashes are inserted inside, and everything is sealed using an ultra-secure locking system, TRADITIUM®.

DURABILITY AND PRODUCT QUALITY

Many may be surprised to learn that the majority of columbaria currently sold are simply a set of glued granite panels or a concrete casing covered with glued granite. They are neither waterproof nor insect-proof, and their durability is far from what people should expect.

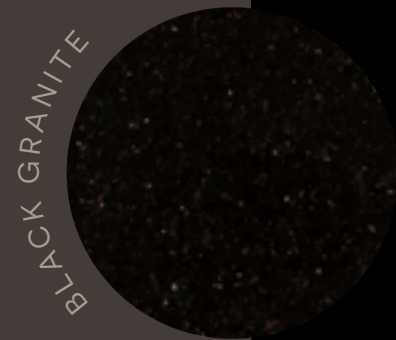

PRESTIGE COLLECTION

The entire range of TRADITIUM® columbarium products is also available in solid bronze. Prices and details are available upon request.

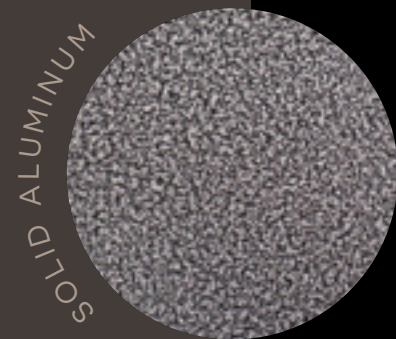

INTELLECTUAL PROPERTY

The TRADITIUM® columbarium product line benefits from intellectual property protection. TRADITIUM® is a registered trademark in Canada, the United States, and Europe, owned by Gestion Morin et Gibson Inc., used under license by Monuments Gibson Inc.

All TRADITIUM® products are protected by intellectual property, including trademarks, industrial designs, and are currently pending patent applications in nearly 70 countries.

BLACK GRANITE

SOLID ALUMINUM

SOLID BRONZE

PRESTIGE

- 1 GRANITE COVER**
Polished granite securely anchored to the TRADITIUM® casing.
- 2 ALUMINUM CORNERS**
Solid aluminum protected by baked enamel paint for ultra-resilience. Solid bronze options available.
- 3 ALUMINUM ROSETTE**
Solid aluminum decoration protected by durable electrostatic paint, supporting the granite door.

- 4 GRANITE DOOR**
Includes an additional sealing door and 2 secure locks for urn access.
- 5 GRANITE SUB-BASES**
2 inches (5 cm) of polished granite atop the base, anchored to the TRADITIUM® casing.
- 6 GRANITE BASE**
Granite base supports the columbarium for added height and protection against landscaping equipment. This base is adjusted to meet the safety standards of each cemetery.

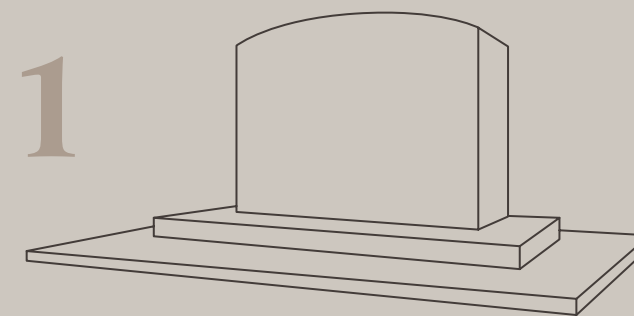

The Traditium® Advantage.

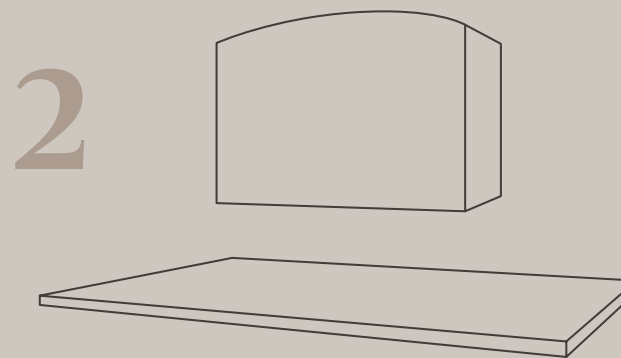

A FUTURE-READY SOLUTION FOR CEMETERIES

TRADITIUM® provides a personalized, durable, and secure alternative for honoring loved ones. Unlike traditional solutions, our innovative system reduces urban sprawl

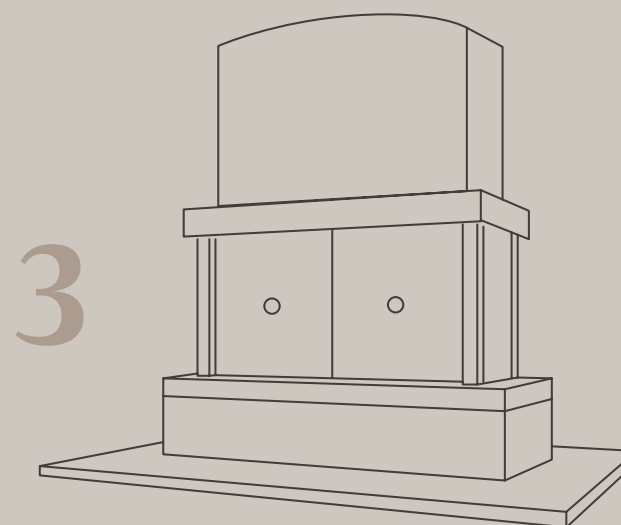

by seamlessly integrating into cemeteries. By increasing the capacity of family plots, TRADITIUM® offers a practical and aesthetic solution for future generations.

COLUMBARIUM BASE

Transportable

THE NEXT GENERATION OF FUNERAL SERVICES

As customs evolve, some families prefer to pay their final respects during a private ceremony or in a symbolic location. TRADITIUM® is also designed to be installed during a family memorial service, thanks to our ceremony transporter.

While a conventional burial involves transporting a casket and remains to the cemetery for the burial ceremony, the transporter, on the other hand, is the tool used to transport the columbarium and urn to the cemetery for the niche interment ceremony of the urn.

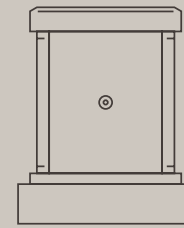

- 1 SUPPORT PLAQUE FOR FLORAL CUSHION**
- 2 HANDLES FOR BEARERS**
- 3 ADJUSTABLE STRAPS FOR THE COLUMBARIUM**
- 4 SUPPORT PLAQUE FOR THE URN**
- 5 LOCKS FOR THE URN SUPPORT PLATE**

Community

Over the years, TRADITIUM® has developed the highest-performing range of community columbaria in the industry. Committed to offering the highest quality products in the funeral industry, TRADITIUM® focuses its efforts on research and development.

Our innovation centers on the fundamental structure of our columbaria. Unlike industry-standard products, which typically rely on assembled granite, ours are constructed using a blend of monocoque central casings and decorative, load-bearing columns. This unique design distributes the structural load onto the casing and corners, ensuring exceptional strength and durability. Our aluminum pillars, protected by baked enamel paint or solid bronze, serve both decorative and protective functions. Granite, meanwhile, is used for aesthetic purposes, protection, and reinforcement of the overall solidity.

LOYALTY GUARANTEE

At TRADITIUM®, we don't just settle for building the best columbaria; we also offer the best industry guarantees. Our standard 15-year warranty is not only the most extensive, it is also renewable for an additional 15 years thanks to our loyalty clause. Furthermore, by choosing to acquire additional columbaria, our customers have the opportunity to extend indefinitely their warranty.

At TRADITIUM®, we understand the importance of quality and peace of mind in such difficult times. That's why we are committed to providing products and services that exceed our customers' expectations while maintaining the highest standards of excellence and integrity.

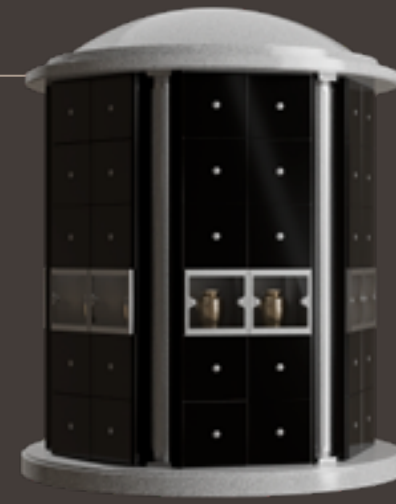

INTERNAL DIMENSIONS OF NICHES

WIDTH ——— 14" | 35.56 CM
 HEIGHT ——— 14" | 35.56 CM
 DEPTH ——— 14" | 35.56 CM

Each niche is equipped with a watertight sealing door with double locks and security screws. Additionally, there is a granite door for the protection and personalization of the commemorated individual.

Make sure that the dimensions of the urns you intend to place inside the niche are in accordance with the interior dimensions mentioned.
